The following is an examiner's statement of reasons for allowance: The Examiner notes for the record that the various rejections and objections set forth in the Office Action dated 1/21/04 have been overcome. However, it is noted that in that Action the Specification was objected to, not rejected, under 35 USC 112, first paragraph (Response, pages 3-4). Additionally, it is noted that US Patent 5,288,400 to Philips which was cited by applicants in their Response is directed to a "Biological Filtration System" and never mentions fluorine containing sheets in its disclosure. Finally, the Examiner notes for the record that applicants have withdrawn their attempts that were previously set forth in two prior Responses preceeding the 1/21/04 Response to amend the Specification on page 11 of the application. In each instance the resulting Action was held to be non compliant since the paragraph presented to be amended was not the paragraph which existed (and still exists) in the Specification. However, it was not necessary to amend this paragraph to obtain a patent, as applicants point out in their Response.
